Dear Parents,

Greetings!

Winter time is approaching and everyone is prone from catching flu. It is recommended as everyday preventive actions to stay away from people who are sick, covering coughs and sneezes and frequent hand washing

To decrease or avoid the increase of flu cases, we would like to advise that if your child is sick (with cough, colds or fever) due to current weather condition, let them stay at home and rest.

We assure that your child will be given time to cope with any missed activity during his/her absence provided that he/she will present medical certificate when he/she reports to school.

Thank you!
